

MA 322: Scientific Computing Lab - IX

1. Approximate the solutions to the following elliptic PDEs by using the five-point stencil finite difference scheme,

(a)

$$\begin{cases} u_{xx} + u_{yy} = 0, & 0 < x < 1, 0 < y < 1; \\ u(x, 0) = 0, & u(x, 1) = x, \quad 0 \leq x \leq 1; \\ u(0, y) = 0, & u(1, y) = y, \quad 0 \leq y \leq 1. \end{cases}$$

Use $h = k = 0.2$ and compare the results to the exact solution $u(x, y) = xy$.

(b)

$$\begin{cases} u_{xx} + u_{yy} = 0, & 0 < x < 1, 0 < y < 1; \\ u(x, 0) = 0, & u(x, 1) = \frac{1}{(1+x)^2 + 1}, \quad 0 \leq x \leq 1; \\ u(0, y) = \frac{y}{1+y^2}, & u(1, y) = \frac{y}{4+y^2}, \quad 0 \leq y \leq 1. \end{cases}$$

Use $h = k = 0.2$ and compare the results to the exact solution $u(x, y) = \frac{y}{(1+x)^2 + y^2}$.

(c)

$$\begin{cases} -\Delta u(x, y) = \pi^2 \cos(\pi x), & \text{in } \Omega = (0, 1) \times (0, 1), \\ \frac{\partial u}{\partial n} = 0, & \text{on } \partial\Omega. \end{cases}$$

(d)

$$\begin{cases} u_{xx} + u_{yy} = x^2 + y^2, & 0 < x < 1, 0 < y < 1; \\ u(x, 0) = 0, & u(x, 1) = \frac{x^2}{2}, \quad 0 \leq x \leq 1; \\ u(0, y) = \sin(\pi y), & u(1, y) = e^\pi \sin(\pi y) + \frac{y^2}{2}, \quad 0 \leq y \leq 1. \end{cases}$$

Use $h = k = 0.2$ and compare the results to the exact solution

$$u(x, y) = e^{\pi x} \sin(\pi y) + \frac{(xy)^2}{2}.$$

(e)

$$\begin{cases} u_{xx} + u_{yy} + u = 2x - y, & 0 < x < 1, 0 < y < 1; \\ u(x, 0) = 2x, & u(x, 1) = 2x - 1, \quad 0 \leq x \leq 1; \\ u_x(0, y) + u(0, y) = 2 - y, & u(1, y) = 2 - y, \quad 0 \leq y \leq 1. \end{cases}$$

Use $h = k = 0.2$ and compare the results to the exact solution

$$u(x, y) = 2x - y.$$

(f)

$$\begin{cases} u_{xx} + u_{yy} + u_x + u_y + u = e^x(2 \cos y - \sin y), & 0 < x < 1, 0 < y < 1; \\ u(x, 0) = e^x, & u(x, 1) = e^x \cos(1), \quad 0 \leq x \leq 1; \\ u(0, y) = \cos(y), & u(1, y) = e \cos(y), \quad 0 \leq y \leq 1. \end{cases}$$

Use $h = k = 0.2$ and compare the results to the exact solution $u(x, y) = e^x \cos(y)$.

2. Solve the system of linear algebraic equations of the above elliptic BVPs by *Gauss-Seidel iterative method*.
3. Solve the system of linear algebraic equations of the above elliptic BVPs by *Jacobi iterative method*.

Provide the following:

- (a) Draw the surface plot of the exact and numerical solutions
- (b) Draw the contour plot of the exact and numerical solutions
- (c) Draw the surf plot of the absolute error.
- (d) Plot $\Delta x (= \Delta y)$ versus *Max. Error* in loglog scale.
